SUMMARY

Full-Stack Web Developer with an engineering background and a strong passion for **efficiency** and **creativity**. As a catering associate, improved operational efficiency by 30%, generating over \$70,000 in additional revenue. Enhanced customer satisfaction while optimizing workflows. Seeking an organization where I can **grow** and **collaborate**.

SKILLS

Front-end Development

- HTML5, JavaScript, TypeScript
- Responsive Design
- React, Angular, Next.js
- CSS3, SCSS, Tailwind

Back-end Development

- Python
- SQL
- RESTful APIs
- Databases and data analytics
- Django

More

- Version Control Systems (Git, GitHub)
- Testing (Jest, basic TDD)
- Agile / SCRUM
- Deployment (Azure, AWS, ...)

EDUCATION

CAREERFOUNDRY
Full-stack web development
• Python Specialization
12 / 2025

UNIVERSIDAD DEL ROSARIO
No Degree – Biomedical
Engineering
Bogota, Colombia
• Research Student Leader,
PROMISE Research Group
06 / 23

WORK EXPERIENCE

Fancy That Bistro

Jan 2024 – Current

Catering Associate

- Helped generate approximately \$500/day in additional revenue, with catering orders averaging \$300–\$1,000.
- Optimized kitchen workflows and workspace organization in a low-staff, high-volume catering environment.
- Reduced prep time per order, enabling higher daily order capacity.
- Adapted recipes efficiently to meet custom client requests without impacting delivery timelines.

Tacos el Puebla

Aug 2023– Dec 2025

Food Truck Manager

- Managed operations in a high-volume, low-staff environment, leading a team of four through collaborative workflows.
 - Implemented improved order intake and delivery processes, increasing speed and clarity among team members.
- Reduced customer complaints to near zero by strengthening communication and optimizing service flow.

PROJECTS

Recipe App

Python, Django, HTML, SQL

- Developed a Django-based web application using the MVC (MVT) pattern.
- Designed relational models using Django ORM.
- Implemented CRUD functionality and user authentication.
- Built dynamic templates with **Django Template Language (DTL)**.

MyFlix (Full-Stack Application)

MongoDB, Node.js, Express.js, React, Angular

- Built a **RESTful API** using **Node.js** and **Express**, following an **MVC-style architecture**.
- Modeled server-side data with **MongoDB** and **Mongoose**, including schemas, validation, and relationships.
- Developed **React** client using functional components and hooks.
- Built an **Angular** client using services, routing, and modular architecture.
- Tested API endpoints using **Postman** and environment-based configuration.

Tacos el puebla

HTML, CSS, JavaScript, Bootstrap

- Applied component-based layout principles for reusable and maintainable UI sections.
- Designed a clean, basic, and functional interface focused on clarity, usability, and accessibility.
- Created design and integrated original photography
